Work Experience

DevOps Engineer with 9.5 years of experience, specializing in designing, automating, and optimizing large-scale distributed systems, including 2 Years as an SRE Lead. Strong expertise in AWS, Kubernetes (EKS & on-prem), Jenkins, Terraform, Helm, and Python for building automation tools and CI/CD pipelines. Proven track record in handling high-traffic systems, improving performance, and driving end-to-end infrastructure automation.

flex.ai (Dec 2025 – Till Now)

Role: **Sr. DevOps Engineer** | Location: Bangalore | OS: Linux

Responsibilities:

- Architected AI-assisted DevOps workflows for infrastructure provisioning (Cloud and Baremetal-using Metal as a Service), monitoring, alerting, operational diagnostics, and developer workflows, significantly reducing manual platform operations.
- Designed and implemented a reusable multi-cloud Kubernetes platform supporting AWS, GCP, Azure, Scaleway, and on-prem environments, enabling standardized cluster provisioning through GitHub Actions, K3s, Helm, FluxCD, and Teleport.
- Maintaining status page for different AI Model components.
- Worked on AI models hosting and deployments.

Interface.ai (Aug 2023 – Jul 2025)

Role: DevOps III | Location: Remote | OS: Linux

Responsibilities:

- **Automated onboarding of new application, which includes building images, infra creation (IaC), deployments, alerts, etc., using Jenkins, terraform, helm, ECR, etc.**
- **Led the architecture and migration of enterprise Jenkins infrastructure to Kubernetes (EKS). Migrated Jenkins to EKS using operator and configuration as a code setup. Standardized Jenkins Groovy and DSL jobs for different environments.**
- **Upgraded RDS from deprecated versions to the version and saved the extended support charges. Updated RDS certificates for all the databases.**
- **Planned logical replication of AWS RDS Postgres and executed the plan across environments, including production. Automated the replication using Jenkins' job.**
- **Upgraded EKS clusters.**
- **Built Python automation framework leveraging Superset APIs to manage dashboards, datasets, database connectivity, and version upgrades at scale.**

Crewscale (July 2021 - Aug 2023) | Client: Games24x7 Pvt. Ltd.

Role: **Lead SRE @Games24x7** |Location: Remote | OS: Linux

Responsibilities:

- Led Site Reliability Engineering initiatives for one of India's highest-traffic gaming platforms, owning platform reliability, infrastructure modernization, deployment automation, and operational excellence.
- Re-architected infrastructure automation framework, reducing operational codebase by over 75% while improving maintainability and extensibility.
- Developed and implemented Jira dashboards to monitor the performance and compliance of task-based Service Level Agreements (SLAs) and Service Level Objectives (SLOs).
- Implemented Infrastructure as Code solutions that optimize deployment, scalability, reliability, and automated onboarding of new applications and third parties on AWS EC2 and Kubernetes (EKS) clusters. Streamlined these processes through automation tools such as Terraform, Ansible, Helm, Jenkins, Packer, etc.
- Redesigned and standardized all the DynamoDB calls from all the Jenkins Groovy files.
- Managed configuration for traffic during events like the Indian Premier League (IPL), World Cup, Asia Cup, etc.
- Reduced the number of lines (shell scripting, Bash, and Python programs) for starting and stopping stacks from 6000 to 1500. Making it modularized and easy to read.
- Automated the Slack channel creation and deletion for notification of Jenkins job status and monitoring metrics using Python scripts.
- Fixed bugs of auto-creation of AWS Elasticache during environment creation for developers and saved expenses on AWS infra
- POC in Scylla DB, JProfiler, and Pyroscope profiling.

VVDN Technologies (Nov 2020 - July 2021)

Role: **Senior Engineer** | Location: Gurugram/Noida | OS: Linux

Responsibilities:

- **Implemented Jenkins** for installation and deployment automation.
- Installed the product in production using **multi-master Kubernetes clusters**, an **external ETCD cluster**, and PCS clustering. Did **POC on dual-stack calico networking on Kubernetes clusters.**
- Did POC on the Redis DR setup.
- Updated Python binaries in offline mode.
- Managed tea**m of 4 (2 interns + 2 junior DevOps)**
- Used **Kube-bench** to perform CIS benchmark scanning and integrated security hardening steps into the Kubernetes cluster installation process.

PAYTM INDIA: (Nov 2019 - Nov 2020)

Role: **Senior DevOps Engineer** | Location: Noida | OS: Linux

Responsibilities:

- Created end-to-end Jenkins pipelines for new microservices in **Kubernetes** clusters and on-prem setup.
- Automated repetitive tasks.
- POC on the **Spinnaker** tool in the development environment.
- Development and rollback of deployment flows.
- Maintained live traffic with zero downtime during deployment.
- Made existing pipelines more robust by updating the code.

AMDOCS INDIA: (AUG 2016 - NOV 2019) Location: Pune/Gurugram

Role: **Technology Integration Engineer (Aug 2016-June 2019), Developer (June 2019-Nov 2019)**

Responsibilities:

- Analyze logs and database tables. Extracted useful information and stored it in comma-separated value (.CSV) files. Created charts and graphs using these (.CSV) files. Created dashboards and set alarms and thresholds in ManageEngine.
- Regularly interacted with clients to resolve queries. Most of the tasks involved product installation, creating clusters for different products, creating Jenkins flow jobs, maintaining databases, importing and exporting DB backups, and deployments.

Skills	
Cloud	AWS: S3, CloudFront, IAM, EC2, Lambda, API Gateway, SNS, ElastiCache, DynamoDB, R53, ECR, EKS, CloudWatch, VPC, Secret Manager, OpenSearch
Configuration Management	Terraform, Ansible, Pulumi
CI/CD & Automation	Jenkins, Groovy, Shell Scripting, Python, FluxCD, Git Actions
Containerization & Orchestration	Docker, Kubernetes, EKS, Helm, Istio
Source Control & Project Management	Bitbucket, Git, Jira
Observability	Grafana, Prometheus, Consul, Slack, Datadog, Apache Superset, StatsD, Consul, Telegraf, PagerDuty, Slack
Database & Storage	PostgreSQL, ScyllaDB, MongoDB
Security & Compliance	kube-bench (CIS Benchmarks for Kubernetes), AWS CloudTrail (Audit Logging), IAM Policy Management, Teleport
Others	Python (Django), Gitlab, Redis, PCS Clustering, Keepalived, ETCD Clustering, Jprofiler, Pyroscope Profiler, WebLogic Clustering, Ant, Maven, Oracle DB, Nexus, Perforce, Metal as a Service(MaaS)

Address

House No. 472, Friends Colony

Line Par, Bahadurgarh,
Jhajjar, Haryana-124507

Academic

Exam	Univ. / Board	Year	Percentage
10th	KV, Jharoda	2008-2009	84.60%
12th	KV, Jharoda	2010-2011	86.00%
BTech	MANIT, Bhopal	2012-2016	6.58 GGPA

Additional Information

- Regular participation in online coding competitions
- Qualified for 1st round in Google Code Jam, 2018
- **School topper** in class 12th
- Scored **93/100 in computer science** in class 12th
- Represented school in inter-KV chess competition, Delhi (2011)
- Secured First position in chess in college hostel: 2 Sport Fest 2013
- Participated in Kabaddi Sportomania 2014 and 2015, MANIT's Annual Sports Fest
- Played in the inter-NIT Kabaddi competition at NIT Rourkela
- Developed basic **Android applications** like calculator, tic-tac-toe, math quiz games, etc.
